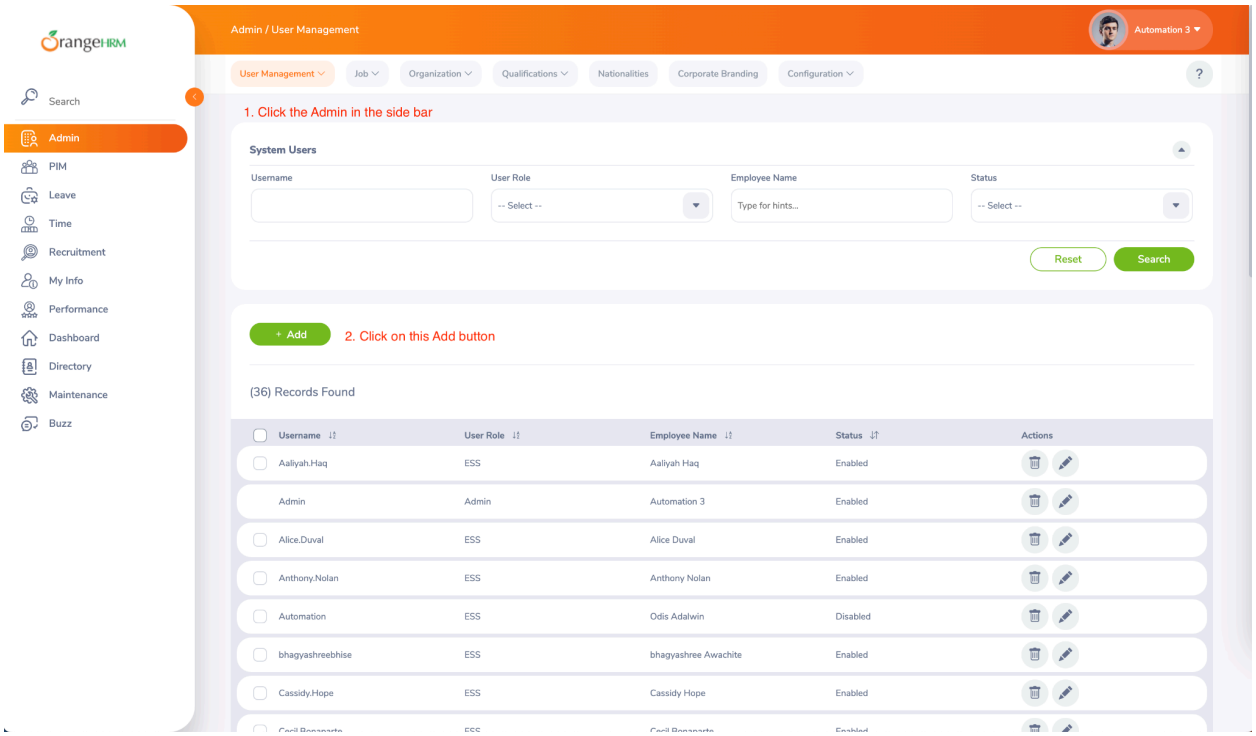
Coding Questions:

Use Selenium WebDriver to finish the following process:

1. Login to this website with suggested username and password:

https://opensource-demo.orangehrmlive.com/web/index.php/auth/login

2. In the homepage, click “Admin” and “Add” buttons



3. In the user creation page

(1) Select the user role from the dropdown button

(2) Select an existing employee from dropdown list (you can see the dropdown list after you enter some text in the text box)

(3) Select Status as enabled

(4) Enter the username and password

(5) Click on “Save” button

4. Go back to the user management page, search for the username of the user you just created. You should see the user information in the search result. Create an assertion to validate that the user exists and the username matches your previous input.
